Potassium Bicarbonate

Name: Potassium Bicarbonate

CAS No.:298-14-6

Molecular Formula: KHCO₃

Specification:

Appearance	White crystal powder
Content	99%min
Insoluble in water	0.02%max
Loss on Ignition	0.25%max
pH value	8.6max
Pb,mg/kg	5max
As,mg/kg	3max

Usage: Potassium Bicarbonate is used as a raw material producing potassium carbonate, potassium acetate and potassium arsenite. Also it is a fire-extinguishing agent for oil and chemicals. It is used in medicine and baking powder

Packing: 25kgs or 50kgs or 1000kgs or as client's request.

Storage: Store at a cool, dry and well ventilated place. Avoid moisture and water.
